1. Overview

Welcome to Splash Math. The Implementation Guidelines specify how the Splash Math program should be used to achieve maximum results. It also includes step by step directions for creating your Splash Math Teacher account and adding students to the program. Should you have further questions or problems please write to us at help@splashmath.com.

2. Getting Started

2.1 Login to your teacher account

You can access the Splash Math program on any computer with internet by visiting <https://www.splashmath.com/> and selecting the “Login” button at the top right corner of the screen.

2.2 Create your class

Once logged in, you will be prompted to create your first class (if you have not done that already). Just select the grade level of your class and enter your desired class name, for eg. you can enter “Copper’s First Graders” or Ms. Cooper’s Super Stars - Grade 1.

Congratulations! Now create your first classroom

eg: Cooper's 1st Graders

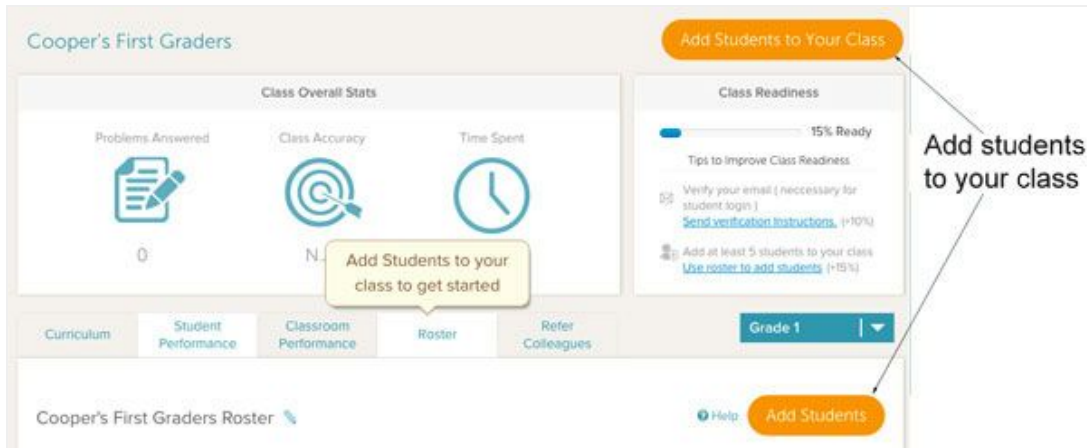

Kindergarten

Next

2.3 Add students to the class

Congratulations! Your teacher account is ready. Now all you need is to add students to your class.

1. After reaching your class dashboard look for “Add Students” button. It is available on your main dashboard as well as “Roster” section. Click it to visit the add student page.

2. You can add students to your class in one of the two ways:
 - a. By entering student names separated by commas, for eg. Jack Dawson, Rachel McGregor, Hilda, John.

Add Students to Cooper's First Graders

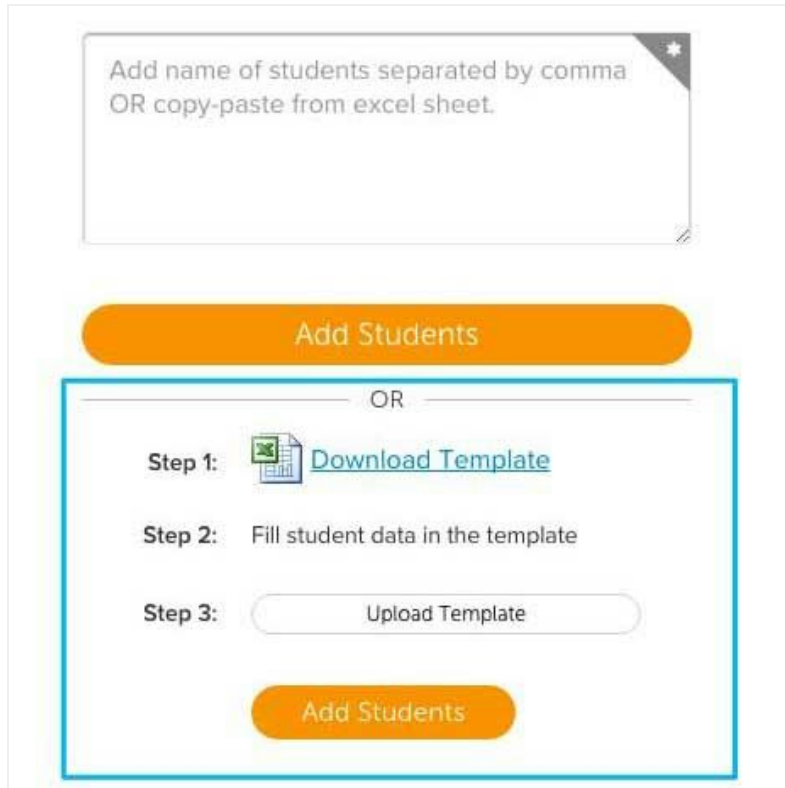

Add name of students separated by comma
OR copy-paste from excel sheet.

Add Students

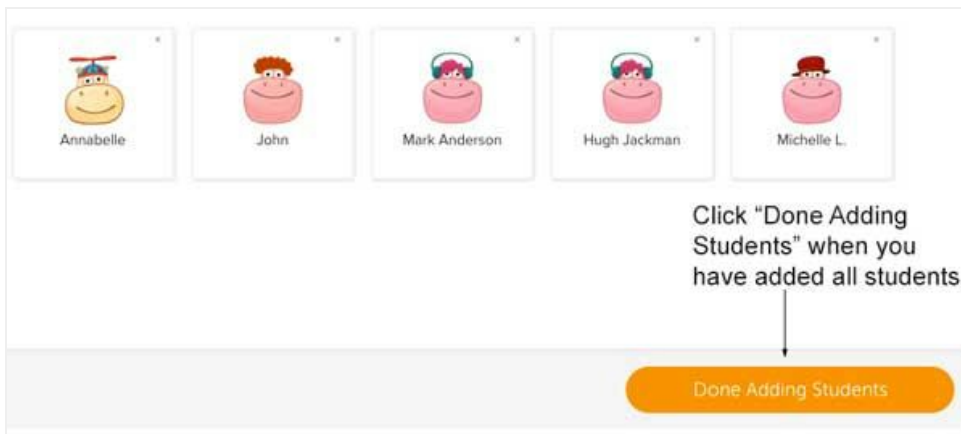

OR

Add Students using Spreadsheet

- b. By using an excel spreadsheet: To add students using an excel spreadsheet click “add students using spreadsheet” option. Download the excel template and fill out the fields as directed, save the excel file to your computer, then upload the excel file by clicking the “Upload Template” button.

- c. When you are finished adding all of your students, click “Done adding students” at the bottom of the screen

Splash Math Tip

You can change your student logins and passwords to match something that they already use. Just go to the roster page and click on username or password to edit.

	Annabelle		annabelle1891	ipad8	Click to Add	Edit Delete
---	-----------	--	---------------	-------	--------------	---

2.4 Distribute student logins

When you add a student to your class, Splash Math automatically generates their username and password. To download and print these login credential as parent cards click “Download parent cards” after adding students. These are the credentials students will use to login to Splash Math at home and at school. Student login credentials can also be obtained under the Roster Tab on the main dashboard.

After Adding Students

Download and Print Parent Cards

Print and hand out these roster cards to students.
 Each card has student username and password.
 Students can login to their Splash Math classroom account.
 Students can practice at home using these credentials.

3. Access Splash Math on the web

3.1 As a student

3.1.1 Student Login

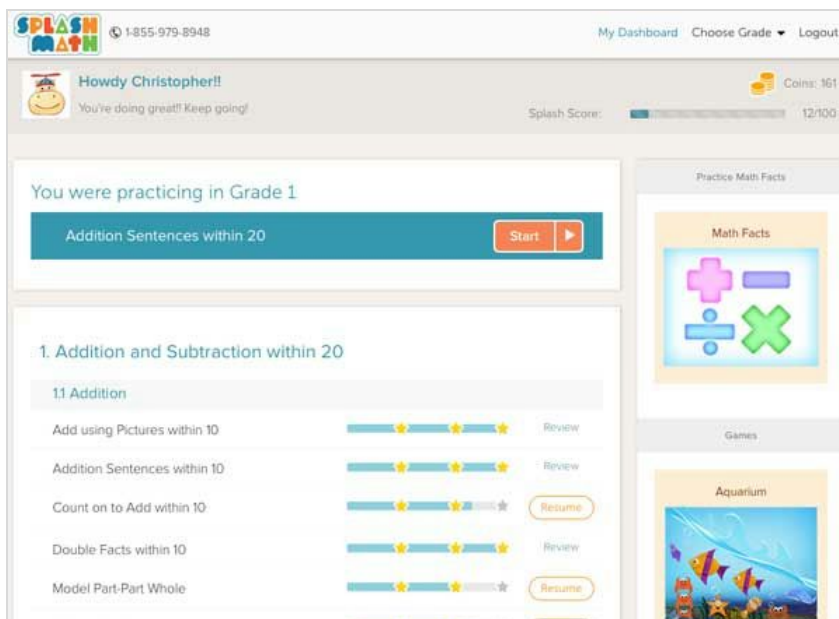

Your students can access the Splash Math program on any computer with internet by visiting <https://www.splashmath.com/students> and entering their username and password.

The screenshot shows the Splash Math website's student login page. At the top, there is a navigation bar with the Splash Math logo and the phone number 1-855-979-8948. The main content area is titled "Student Login" and contains two input fields: "Username" and "Password". Below the password field is a checkbox labeled "Show Password" which is currently checked. A large orange "Sign in" button is positioned below the form. At the bottom left of the form area, there is a link that says "Back To Home".

3.1.2 Student Dashboard

As soon as the students log in to Splash Math, they are sent to their personalized dashboards. Students can start practicing by clicking "Start" button.

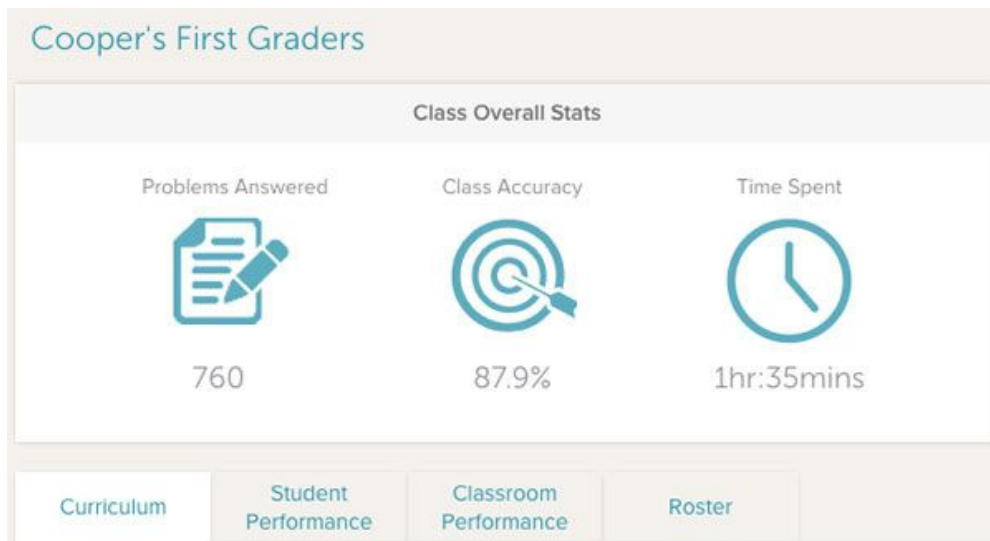

The screenshot displays a student's personalized dashboard on the Splash Math website. At the top, there is a navigation bar with the Splash Math logo, the phone number 1-855-979-8948, and links for "My Dashboard", "Choose Grade", and "Logout". Below the navigation bar, the user is greeted with "Howdy Christopher!!" and a message "You're doing great!! Keep going!". To the right, there are indicators for "Coins: 161" and "Splash Score: 12/100". The main content area is divided into several sections. On the left, there is a section titled "You were practicing in Grade 1" with a prominent "Start" button for "Addition Sentences within 20". Below this, there is a section titled "1. Addition and Subtraction within 20" which lists various activities with progress bars and "Review" or "Resume" buttons. On the right side, there are two sections: "Practice Math Facts" featuring a "Math Facts" button with mathematical symbols, and "Games" featuring an "Aquarium" game button with a colorful illustration.

3.2 As a teacher

3.2.1 Teacher Dashboard

With your teacher dashboard, you can manage your classroom and assign individualized practice to each of your students. You can view in-depth reports about the performance levels of both individual students and the class as a whole so that you can tailor your lesson plans and math practice problems to better serve the needs of your students.

Your classroom dashboard has 4 major sections:

- 1. Curriculum:** This is an overview of the curriculum by grade level. You can preview the available lessons by clicking on the lesson title.
- 2. Student Reports:** This section provides extensive student reports which can be used to monitor overall progress of each student as well as deep dive into the activity to find possible trouble spots.
- 3. Classroom Reports:** This is one of the best and time-saving way to monitor the class performance. You can view the performance of all of your students in all the skills in a single view or deep dive into the performance of all students in one skill.
- 4. Roster:** Use this section to edit your class name or student information. You can also add or delete students from this section.

4. Access Splash Math on the iPad*

You and your students can access the Splash Math program on an iPad by downloading the [Splash Math - K to 5 app](#) from the Apple App Store and following the procedure below.

* This feature is available only in Classroom Premium Plan.

4.1 One-to-One Deployment

In one-to-one deployment, Splash Math account belongs to the student. They just have to log in once and then keep practicing. It saves time in setting up of the iPad before the start of every class. Also, their dashboard has limited options to help them focus only on answering problems.

4.1.1 Student Login

1. Open the app and tap “Already Registered”.

2. Next, enter student username and password in the shown fields and tap “Sign in”.

4.1.2 Student Dashboard

After successful login, students will be taken to their personalized dashboard. Tap on any balloon (chapter) to get started.

4.2 One-to-Many Deployment

In one-to-many deployment, Splash Math account belongs to the teacher. They have full control over the iPad and can easily switch student who will use the iPad in a particular class.

4.2.1 Teacher Login

1. Open the app and tap "Already Registered".

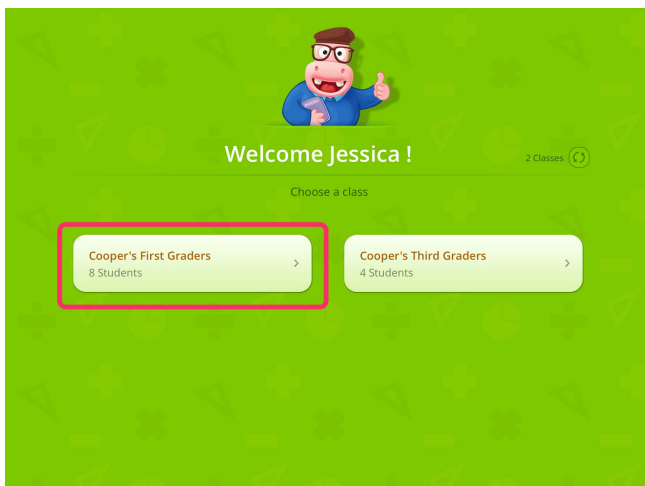

- Next, enter your teacher email and password in the shown fields and tap "Sign in".

4.2.2 Teacher Dashboard

- After successful login, you will be taken to your dashboard with the list of all your classes. Tap the class you are currently teaching to see the list of the students.

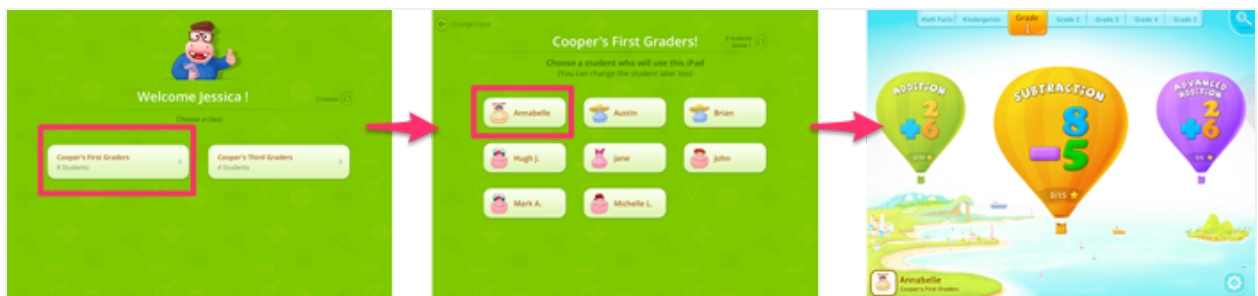

- Next, select the student who will use the iPad.

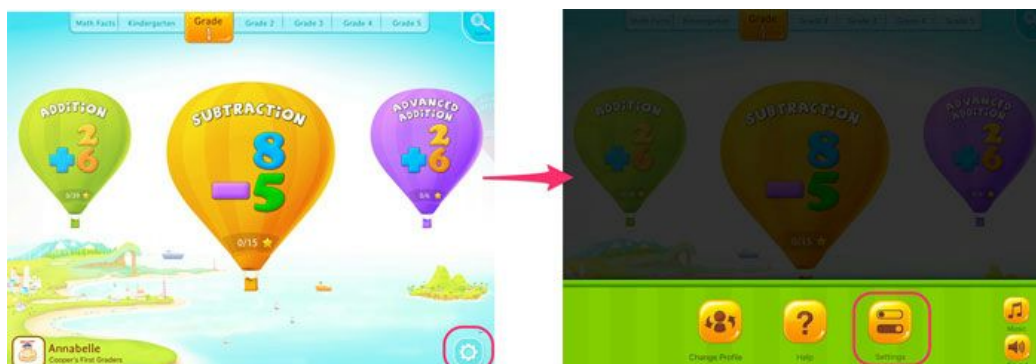

3. This will redirect you to the personalized dashboard of the student. Tap on any balloon (chapter) to get started.
4. To change the student who will use the iPad, tap on the gear icon and then “Change Profile” button.

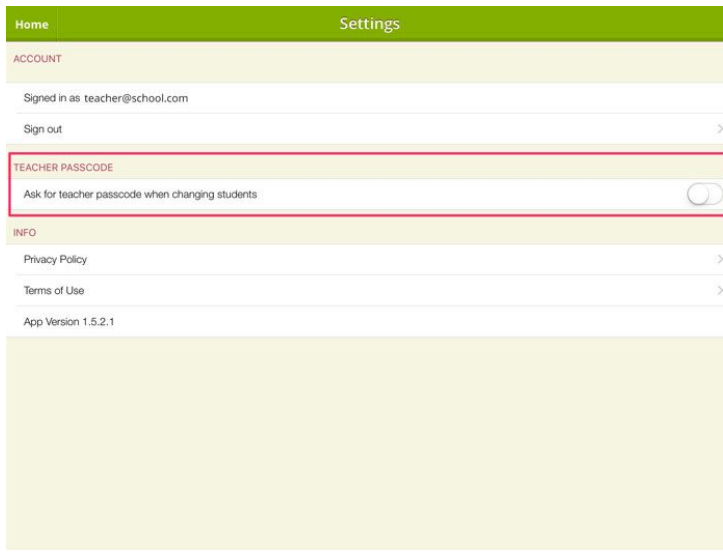

4.2.3 Teacher Passcode

Teacher passcode can be used to restrict your students from changing profiles or signing out of the app. By default, this feature remains off. Please follow these steps to turn this feature ON and set your teacher passcode.

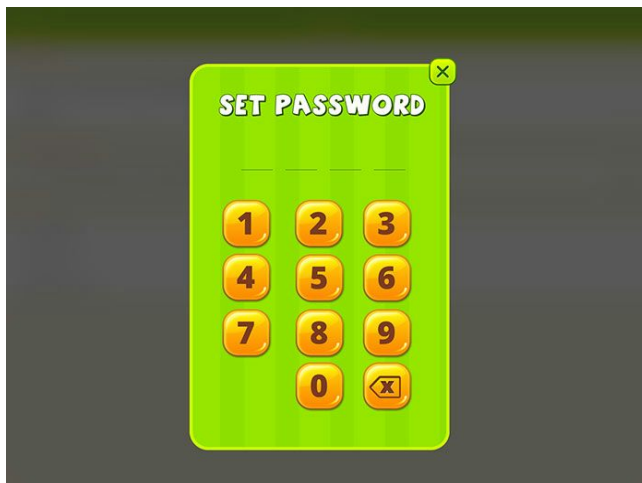

1. Visit your profile settings by tapping on the gear icon on the bottom right from student dashboard (screen with balloons) and then tapping ‘Settings’ button.

2. Toggle ON the 'Teacher Passcode' from your settings screen.

3. Next, set your 4 digit teacher passcode.

4. That's it. Now teacher passcode will be needed to change student profiles or visit your profile settings.

5. Implementation Strategies

5.1 Individual practice

When your students work individually on problems from a topic then only you get a sense of where each student is at on that topic. However with regular paper worksheets - handing out worksheets, going over them, correcting and so on - it becomes difficult to focus on all your students. Splash Math time to the rescue!

Follow up direct instruction and lesson plan with a practice and review session on Splash Math. Depending on your lesson plan, map the exercise on Splash Math, and assign it to the students. With Splash Math, it becomes very easy to track progress for every student, determine where each student is at, and understand the level of understanding of the concept taught that day. Now you can go back to the students who need more help on the topic.

5.2 Differentiation and Personalization

Most probably your class has students with varying understanding levels. Some could be below the grade level and some above it. With multi-grade access on Splash Math from Kindergarten to Grade 5, you can provide varying degrees of depth to your students. Take a look on Splash Math reports for each student on a regular basis. This will help you in your evaluation of that student and change his learning plan going forward.

	Abigail	Aiden	Aubrey	Ava	Benjamin	Chole	Caleb	Ella	Emitt	Emma
Number Sense										
1.1 Round to the Nearest Ten	13%	20%	70%	100%	30%	11%	0%	99.1%	20%	0%
1.2 Round to the Nearest Hundred	0%	8.7%	98.5%	15.1%	73.7%	81%	90%	70%	0%	0%
Addition										
2.1 3 Digit + 1 Digit with regrouping	0%	80%	70%	0%	25%	90%	89%	100%	77%	0%
2.2 3 Digit + 2 Digit	8.7%	75%	10%	81%	70%	8.7%	99.1%	70%	5.1%	98.5%
2.3 3 Digit + 2 Digit with regrouping	0%	45%	0%	45%	31%	1.1%	70%	0%	0%	70%
2.4 3 Digit + 3 Digit	70%	71%	45%	0%	70%	8.7%	30%	81%	100%	0%
2.5 3 Digit + 3 Digit with regrouping	0%	45%	45%	8.7%	45%	0%	0%	70%	20%	0%

Here is one way you can employ based on the current understanding level of the students:

- Students below the grade level:** Splash Math is ideal for use as a response to intervention framework. You can get your students started on 1 grade level below and take a look at their reports to identify which skills need to be re-taught.
- Students above the grade level:** Students who are above grade level get easily bored in the class. Practice is a particular challenge for them since they feel they 'know it already'. Splash Math greatly helps here, curriculum across K-5 provides ample opportunities for challenge, lateral thinking and deeper exploration of the concepts. You can get them started by assigning skills from a higher grade level. Skills can be related to your grade level lesson plan.

5.3 Preparation of standardized tests

Splash Math is common core aligned and the curriculum is laid out in an easy to understand manner.

First Grade Common Core Math Help

Operations & Algebraic Thinking

Number & Operations in Base Ten

Measurement & Data

Geometry

Extend the counting sequence.

1.NBT.1 Count to 120, starting at any number less than 120. In this range, read and write numerals and represent a number of objects with a written numeral.

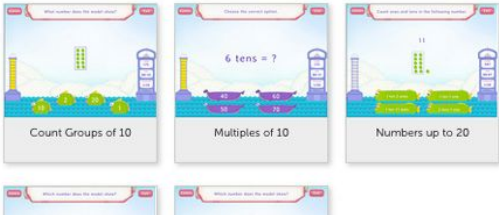

Count to 50

Count to 100

Count to 120

Understand place value.

1.NBT.2 Understand that the two digits of a two-digit number represent amounts of tens and ones. Understand the following as special cases:

Count Groups of 10

Multiples of 10

Numbers up to 20

Here is one of the way which you may follow to prepare for standardized tests

Step 1: Get your students started on Splash Math one standard at a time. The objective here is to assess the student's level of understanding and comfort with the concept.

Step 2: Analyze student reports. For instance, on classroom performance report, the red areas helps you focus on specific students for the specific skills.

Step 3: Final step is to assign remedial work on Splash Math to students based on the reports. Splash Math does much of this work within the program itself since it adapts to the performance so far of the student.
